

. 1. XML validation with no error:

2. XML validation with errors:

The screenshot shows a web browser window with the address bar displaying `http://localhost:50646/tryIt.aspx`. The page content includes:

- A red heading: **Welcome to the Test Page!**
- A blue link: **1.Verification**
- A label: **Input URL of XML file:** followed by a text input field containing `http://www.public.asu.edu/~ezha1/ServicesWithError.xml`.
- A label: **Input URL of XSD file:** followed by a text input field containing `http://www.public.asu.edu/~ezha1/Services.xsd`.
- A text area displaying validation errors:

```
Validation Error: The element 'Operation' has invalid child element 'NameS'. List of possible elements expected: 'Name'. Validation Error: The element 'Service' has invalid child element 'Operations'. List of possible elements expected: 'Provider'. Validation Error: The element 'Service' has invalid child element 'Operationsccc'. List of possible elements expected: 'Operations'.
```
- A button labeled **Verify**.
- A blue link: **2.Search WSDL Operation Names**
- A label: **Input WSDL URL:** followed by a text input field and a **Search** button.

The Windows taskbar at the bottom shows icons for Internet Explorer, File Explorer, and other applications, with the system clock displaying 12:00 PM on 11/11/2015.
